- (6) Admission will be revoked if any irregularities in the submitted documents are found.

9. Control and Prevention of Infectious Diseases

- (1) Regarding submission of a certificate demonstrating inoculation and an antibody test against measles and rubella:

Kobe University has implemented the Measles and Rubella Registration Policy, and all newly enrolled Kobe University students must submit one of the following three certificates (①, ②, or ③) to prevent a possible outbreak of measles and rubella on campus.

- ① A vaccination certificate to prove that you were inoculated against measles and rubella (twice each).
- ② A vaccination certificate to prove that you were inoculated with measles and rubella vaccines each within the last five years .
- ③ An antibody certificate verifying that you have sufficient antibody titer in your blood (refer to the chart next page) to prevent the development of measles and rubella, based on the results of an antibody test performed within the last five years.

* For ① and ②, it can be a combined vaccine of measles and rubella vaccines (e.g., MR vaccine).

* For ① and ②, the certificate must be issued by an accredited medical institution and state the type of vaccine and the date of inoculation.

* For ③, the certificate must specify the measuring method and the measured values of antibody titer in your blood (refer to the next page), and it must satisfy the judging standard listed in the chart. A blood test report sheet itself can be accepted for submission.

If the antibody titer in your blood is insufficient, you must receive the necessary vaccination,

and submit either ① or ②.

* You may submit a combination of ①, ②, and ③ (e.g., ① for measles, and ③ for rubella).

* If the antibody titer level is below requirements, yet you cannot be inoculated with vaccines for some reason (e.g., illness or body composition), please submit an official document (for example, a certificate issued by the doctor) explaining why.

<Submission Period and Place of Submission>

- Successful applicants enrolling in October.

Submit the certificate when you register at the Medical Center for Student Health (Rokkodai) during the routine medical check-up scheduled for early October.

Measuring Methods and Judging Standards for Protective Antibodies in Blood

	Measuring Method	Judging Standard	Remarks
Measles	IgG—EIA method	$8.0 \leq$ positive	Positive result by one of these three methods.
	PA method	$256x \leq$ positive	
	NT method	$4.0x \leq$ positive	
Rubella	HI method IgG—EIA method	$32x \leq$ positive $8.0 \leq$ positive	Positive result by one of these two methods. (HI method is recommended)

Make sure the above methods are followed when the antibody titer is measured in your blood. The protective antibody value differs according to the measuring method used. Please note that **the judging standards are higher than the usual standards used at medical institutions.**

When you visit a doctor at a medical institution, make sure you present this guidebook so your doctor can issue the necessary certificate(s). (Please make sure you confirm with your doctor the measuring methods and judging standards when measuring the antibody titer in your blood.)

* Points to Consider when Submitting a Certificate:

① Please submit the original certificate and one set of copies (A4 size).

② If the certificate is written in a language other than Japanese or English, please attach a document that shows either a Japanese or English translation.
